

Agility

April 29th, 2008

Changes to the Schema

- How can we make the schemas more agile?
 - add new tests
 - add new component schemas
- Don't want to wait until a new version
- Is this technical or procedural?

Current Process

- Minor schema releases
 - can add things since don't invalidate existing content
 - about once a quarter
- Issues
 - delays for in other areas delay the additions
 - have to wait for the minor release

Proposals

- ability to just add new stuff to existing version
- a working sandbox
- more frequent minor releases
- `<xsd:any>`
